

## NUMANTEC

### *The new name of leading group in infusion medical devices*

At MEDICA - COMPAMED, the most important world fair dedicated to biomedical devices, (Dusseldorf - Germany - 13th -16th November), Delta Med, together with all companies of the group, will launch the new Brand across all the companies: Numantec.

Now customers and suppliers will have a single partner capable of satisfying all their need regarding the vascular access products and delivery systems.

Delta Med, the Italian leading company specialised in the production and distribution of vascular access catheters; Pentaferte, leader in specialist syringes and infusion pumps; DBM the Italian company focused on the production of prefilled syringes; Adria Med the Italian manufacturer of excellence in elastomeric infusion systems; BEL the Italian manufacturer of Urodynamic catheters and accessories; Securmed the Italian company focused on Urology, surgery, anaesthesiology, and gastroenterology. They will be the main protagonists of this new adventure.

The group today has a turnover of more than 100€ million, 6 production plants in different areas in Italy and in France, and over 400 employees. After the new combined company under a unified brand, now has the size and structure to compete globally.

Gabriele Giovanelli, CEO at Numantec, declares: "in the biomedical sector Numantec is what was missing: a biomedical group that positions itself as a European leader in infusion and devices system. The group will continue to grow, through the development of the latest generation medical devices and through the strategic acquisition of leading companies to compliment the group. Our mission is to be the forefront of

medical innovation, providing solutions that improve people's health and contribute to the progress of the entire industry".

The strength of the new Numantec group will be greater than the simple sum of the individual parts: this combination will allow us to satisfy the needs of our customers and suppliers quickly and efficiently by creating a preferential partner for access to all products of vascular access.
